CONDITIONAL NOTES:

DEVELOPMENT STANDARDS
PART I

Commitment

Development of the real estate identified on the accompanying Technical Data Sheet, prepared by Little & Associates Architects on June 14, 1996, and revised as noted, consisting of 36.3 acres, more or less (the "Site"), and its individual subparcels will be governed by the conditions of these Development Standards, the Technical Data Sheet, and the applicable provisions of the City of Charlotte Official Zoning Ordinance (the "Ordinance"). The applicable tracts will also comply with all requirements of the City of Charlotte subdivision ordinance.

The building configurations, placements, and sizes shown on Sheet RZ-2, which accompanies this rezoning plan for Parcel 1 and Parcel 2, are schematic in nature and may be altered and/or modified during design development and construction document phases within the maximum building areas established on this Rezoning Plan. Parking layouts may also be modified to accommodate final building configurations.

PART II

Statement of Intent

It is the intention of the Petitioner to create within the Site a high quality, mixed use development, offering shopping, office, daycare, and housing opportunities.

PART III

Permitted Development Within the Site

Section 1. Parcel 1 – Shopping, Office, Daycare Components

Parcel 1 consists of approximately 22.3 acres and contains frontage on NC Hwy 27 (Albemarle Road) to the north and Dwightware Blvd. to the east.

(a) Parcel 1 may be devoted to any use (including any accessory use) which is permitted by right or under prescribed conditions in the CC Zoning District under the Ordinance.
(b) The total gross floor area of all buildings constructed within Parcel 1 cannot exceed 127,800 square feet.
(c) Tract C within Parcel 1 will be restricted to use as a daycare center or other uses permitted as low intensity institutional under conditions prescribed under the Ordinance. The maximum number of children in the daycare will not exceed the maximum allowed by the Ordinance.

Section 2. Parcel 2 – Multi Family Development Residential Component

The Multi Family Residential Component contains approximately 14.3 acres, more or less, and is generally located to the south and east of Parcel 1. This parcel will be planned and developed with a unified design of buildings and coordinated common open space and service areas.

(a) No more than 169 residential units may be developed within Parcel 2 at a density of 11.8 units per acre.
(b) The petitioner voluntarily agrees that each residential unit will be developed, marketed, and sold as a single ownership unit. (ie- condominiums townhomes, or similar type of development) Petitioner further voluntarily agrees that within thirty (30) days of approval of this rezoning petition it will record or cause to be recorded a restrictive covenant binding on Parcel II and current and future owners thereof, stating that Subdivision III-2-(b) of these Development Standards are binding in accordance with the provisions of Part VI hereof, and may be enforced at law or in equity by the owners of Parcel I and those owners of property that are entitled to file a protest petition against this rezoning petition under state law or local ordinance.
(c) Subject to the conditions of Part III, Section 2, subsections (a) and (b), the residential component may also be devoted to any use which is permitted by right and the following under prescribed conditions: Adult Care Centers, Adult Care Homes, Bus Stop Shelters, Nursing Homes, Rest Homes, Homes for the Aged and Elderly, Disabled Housing, Planned Multi-Family and Attached, Subdivision Sales Offices, Temporary Buildings and Storage of Material; and related Accessory Uses and Structures in the R-12MF (Residential) Zoning District under the Ordinance.

PART IV

Section 1. Transportation Commitments
(a) The petitioner agrees to dedicate the required right-of-way for the future construction of the proposed eastern circumferential road, which is currently planned to bisect the contiguous property as described within this rezoning petition.
(b) The petitioner will construct the necessary roadway improvements to serve the planned development which will occur within the portion of the property reserved for the Eastern Circumferential Road. The phasing of the construction for these improvements will be determined along with the phasing of the proposed development taking place within the property which will be served by these improvements.
(c) The construction of the necessary roadway improvements, including each access drive into the site, will be made by the petitioner in accordance with the recommendations contained within the petitioner's traffic study and as agreed to by NCDOT, CDOT, and the petitioner. These improvements will include all associated turn lanes, deceleration lanes, and acceleration lanes recommended by the petitioner's traffic consultant and may differ from that which is shown on this rezoning plan. All improvements will be designed and constructed to CDOT or NCDOTstandards, whichever has jurisdiction.
(d) The petitioner further agrees to provide the following traffic improvements as agreed to by the petitioner and CDOT.
(1) Add an eastbound right-turn deceleration lane on Albemarle Road at the primary site drive (Eastern Circumferential) with 150 feet of storage and 240 feet of taper.
(2) If a traffic signal is warranted at the intersection of Albemarle Road with the primary site drive (Eastern Circumferential), the traffic signal shall be privately funded, if such funding is requested by NCDOT.
(3) Design and construct a second westbound left-turn lane (providing dual westbound left-turn lanes) on Albemarle Road at the primary site drive (Eastern Circumferential) with 150 feet of storage.
(4) Design and construct northbound dual left-turn lanes, a through lane, and a right turn lane at the primary site drive (Eastern Circumferential) and Albemarle Road. The left turn lane should provide 250 feet of full storage per lane with a 4 foot concrete median between the west-most left-turn lane and this adjacent southbound lane.
(5) Design and construct two southbound lanes from Albemarle Road for the primary site drive (Eastern Circumferential) to the first east/west site drive, approximately 640 feet south of Albemarle Road. Design and construct turn lanes with 150 feet of storage with 15:1 tapers on both the north bound (Phase 2 construction) and south bound (Phase 1 construction) Eastern Circumferential at second east-west site drive.
(6) CDOT will be responsible for any off-site improvements for the drive serving the Wal-Mart Shopping Center opposite the primary site drive (Eastern Circumferential).
(7) The dedication of the right-of-way for the Eastern Circumferential will be made by petitioner prior to the issuance of a building/driveway permit. Petitioner will complete its off-site roadway improvements as well as the improvements from the intersection of Albemarle Road and the primary site drive (Eastern Circumferential) to the beginning of Parcel 2 (phase line to be shown on the accompanying plan) prior to a permanent certificate of occupancy for any building in Parcel 1, Tract B, Tract C, or Tract A (with the exception of the out parcel).
(8) Channelization for the first east/west site drive shall be 100 feet on both Tract A and Tract B of Parcel 1, and such channelization will be accomplished by means of a concrete median. Channelization for the second east/west site drive shall be 150 feet on the primary drive serving Tract B, Parcel 1, and at least 75 feet for the secondary drive serving Tract C, Parcel 1. Channelization for the second east/west site drive serving Tract A of Parcel 1 shall be 150 feet for the drive, with access to a segregated parking area permitted within that 150 feet of channelization, provided that at least 75 feet of channelization is provided. All channelization to be provided from right-of-way line.
(9) The first east/west site drive shall remain full movement until such time as right-in, right-out turns only are permitted based upon safety considerations and the criteria set out in Part V.1.c. of this sheet. The second east/west site drive shall remain full movement until and after the completion of construction of the Eastern Circumferential.
(10) A residential collector street will be constructed by petitioner to serve the multifamily development as part of the development of that portion of the site (Parcel 2).
(11) Petitioner will provide conceptual planning and design layouts of the proposed Eastern Circumferential within the site, in order to allow design tie-ins with improvements actually constructed by the petitioner, as well as conceptual planning and design for "interim" improvements to the Wal-Mart Shopping Center drive.
(12) Appropriate pavement markings, signs, etc. will be provided by petitioner to accommodate traffic flow.

PART V

Design Guidelines

Section 1. Access Points

(a) The number of vehicular access points into each tract will be limited to those shown on the Technical Data Sheet and each will be located in the general areas depicted.
(b) The placement and configuration of each access point and driveway within the site are subject to any modifications required to accommodate the final site and architectural/engineering construction plans and designs and are further subject to approval by the NCDOT or CDOT.
(c) The operational design of access points from Parcel 1 and Parcel 2 to the proposed eastern circumferential road is subject to future modification upon either the full completion of the eastern circumferential road or when the traffic volumes approaching the Albemarle Road intersection from the eastern circumferential road warrant modification in consultation with CDOT and the current or future property owners.

Section 2. Yard Restrictions

(a) In every instance, the side yard, setback, and rear yard requirements imposed under the Ordinance will be satisfied with respect to development taking place within each component of the site. An additional 100' building structure setback will be imposed for Parcel 2 along the eastern and southern boundaries.

Section 3. Stormwater Management

(a) Stormwater on each Parcel will be managed strictly in accordance with the requirements of the City of Charlotte Engineering Department. In no case will required above ground detention basins occur within any required buffer or setback.
(b) The petitioner agrees to provide on-site stormwater detention/retention to accommodate both a 25 (twenty five) and a 50 (fifty) year storm event.

Section 4. General Design Provisions

(a) Parking: Each of the parking areas depicted on Sheet RZ2 may vary in size and location, but in all events, parking will meet the minimum standards established under the Ordinance. Parking may be constructed inside and outside of the building envelopes as depicted on Sheet RZ1.
(b) Lighting: The uniform lighting system will be employed throughout both Parcels. All direct lighting within the property shall be designed such that direct illumination does not extend past the property lines. Consideration will be given to the impact of lighting both within and without the perimeter of the site. The maximum height of lighting fixtures within the development will not exceed 30'.
(c) Signs: All signs placed on the property will be erected in accordance with the Ordinance. No signage will be allowed along Dwightware Boulevard frontage.
(d) Fire Protection: Plans for each building will be submitted to the Fire Marshall's office for approval before the construction of that building commences. Fire hydrants will be located within the prescribed locations under the Charlotte Mecklenburg Building Code.
(e) Trash Handling: All dumpster areas will be screened in accordance with requirements of the Ordinance. Each dumpster area will be enclosed on all four sides by a fence and a hinged gate which are constructed of brick, wood, masonry, or any combination thereof unless one or more sides of the dumpster area joins the rear of a building. In this case, the rear wall will be substituted for the fence along each such side. Trash pick-up may not occur between the hours of 10:00 p.m. and 8:00 a.m.
(f) Architectural Quality: All buildings constructed within Parcel 1, including the designated outparcel, will be constructed of similar materials so as to provide consistent architectural treatment of the development. All residential buildings within Phase 2 will likewise be of consistent architectural treatment.
(g) A 6' high dogeat fence will be constructed inside of the southern and eastern buffer lines of Parcel 2.

Section 5. Buffer Areas

(a) Exterior buffer areas will be provided as established in the ordinance or as shown on Sheet RZ1, whichever is greater.
(b) All designated buffer areas are to remain as undisturbed open space, except to the extent necessary to accommodate walks, fences, drainage structures, utility lines, and drives, as prescribed within the Ordinance.
(c) In all buffer areas within Parcel 1 where existing trees exceeding 8" in caliper do not exist, the petitioner reserves the right to perform grading activity within these areas within the established buffers and install landscaping berms and/or fencing in accordance with the provisions of Section 12.302 of the Ordinance.

Section 6. Landscaping and Screening

(a) Landscaping and screening shall, at a minimum, satisfy the requirements of the Ordinance.
(b) Landscaping within the site will be planted and improved in sequences which are keyed to the development taking place within each tract.
(c) Landscape treatment along Albemarle Road will be complementary to the existing landscaping at the existing neighboring commercial development.

PART VI

Binding Effect of the Rezoning Application

Section 1. If the petitioner's Rezoning Petition is approved, the development program established under these Development Standards and the Technical Data Sheet shall, unless amended in the manner provided under the Ordinance, be binding upon and inure to the benefit of the petitioner and each of the Owners and their respective heirs, devisees, personal representatives, successors in interest and assigns.
