A PROPOSED TOWNHOME COMMUNITY BY: THE BOULEVARD COMPANY

DESIGNED BY:

DAVID FURMAN/ ARCHITECTURE

-at least 10% of the total number of dwelling units shall be 2,100 sf or greater

4. it is the intent of the architectural treatment and design of elevations facing Park

Road, as well as individual interior units, to croke images of existing single family

residential characteristics. This will be accomplished through a minimum 3 foot

recess of the garage from building face and a change of ridge line direction and

ridge line elevation between garage and building face. Overall material usage,

including windows, will be consistent on all exterior faces of each attached unit

2. the minimum unit width will be 20 feet including the garage.

3. all units shall have at at least an attached one car garage

2. additional plantings per applicable Class "C" buffer requirements will supplement the undisturbed buffers in areas where existing vegetation is sparse

or nonexistent. This plant material can be hand planted within the undisturbed

buffer. Undisturbed buffer may be hand cleared of unsightly vegetation at the

4. any freestanding lighting around perimeter of properties shall be directed towards the interior of the development and shall provide light shields for the

3. all undisturbed buffers will be the maintenance responsibility of the

request of the adjoining property owners

benefit of adjacent property owners.

homeowner's association.

2. main vehicular entry shall be heavily landscaped and accommodate pedestrian

3. interior streetscape design will provide tree plantings, street lighting, sidewalks,

4. street lighting will be pedestrian in scale and in the form of low ambient lighting

similar to lighting at Dilworth Crescent or Hackberry Place in Fourth Ward.

5. the tree ordinance requirements for the tree protection some along Park Road

shall be in effect. The developer shall provide a minimum of 1 tree per unit distributed throughout the site or comply with the tree ordinance, whichever

provides the greater number of trees. All medians or pocket parks to be planted

or landscaped with large maturing trees. The developer shall also ensure every

driveways and common open spaces as noted on plan; however, building

sidewalks, proposed lighting and walls.

parking space will be within 50 feet of a tree.

footprint may vary.

HILLSIDE EAST

Revised May 29, 1996

REQUIRED NOTES:

Property Information

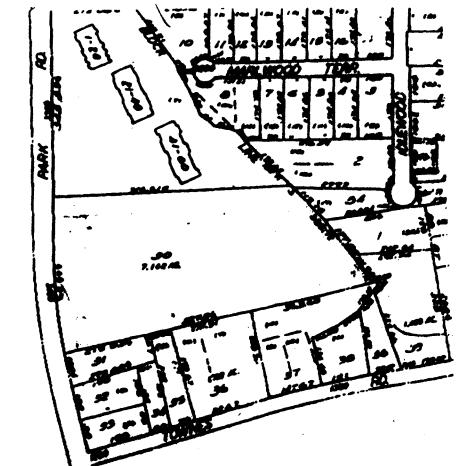

- 1. total acreage is 7.14
- 2. existing zoning is R-4
- 3. proposed zoning is R-8MF(CD) 4. maximum number of units is 57

Setbacks and Required Yards

- 1. developer to dedicate right of way 40' from centerline of Park Road before hide
- permits are issued 2. subdivision setback 40' from new right of way
- 3. minimum building setback 80' from centerline of Park Road
- 4. minimum side yard 10'; adjacent to single family 20'
- 5. minimum rear yard 40'; adjacent to single family 50'

Open Space, Buffers and Tree Save Areas

- 1. minimum open space 50%
- 2. existing trees noted on plan will be saved
- 3. buffer adjacent to single family shall be undisturbed
- 4. undisturbed buffer may be hand cleared of unsightly vegetation at the request of

- Association as-built data, containing an engineer's seal, of the storm water detention facilities to ensure compliance with approved construction drawings.
- 3. the homeowner's association documents will specifically address provisions for budget and reserve funding for maintenance, periodic inspections, and any needed remair of the on-site stormwater detention facilities. Such facilities shall he maintained in compliance with approved detention specification and
- 4. If any other options or alternatives are proposed in addition to or in lien of storm water detention, Fracdom Park Homeowner's Association shall be involved in related discussions and engineering calculations.
- 5. the developer will provide Freedom Park Homeowner's Association with approved construction drawings prior to commencement of construction
- their main entrances be aligned with each other.
 - 1. plans will show proposed refuse storage location and their provisions for screening from nearby units or property owners, access and integration into the overall site design. (Dumpster will not be bested along southern growth line.)
 - 2. all recoving document plans shall show existing 4 foot contours and natural
 - 4. all utilities (electric, cable, phone, etc.) will be underground.

3. all groups of buildings shall be numbered for case of reference
