THE PETITIONER WILL COMPLY WITH THIS RECOMMENDATION: 7/29/01  
 Babak Emadi

Recommendations Concerning storm water:

In addition to the 2 and 10 - year storm events being detained to pre-developed conditions, the petitioner shall agree to provide storm water detention for the 25 through 100 - year storm event such that post development runoff rates do not exceed those produced by the R-3 land cover.

In lieu of the increased detention, the petitioner may provide a detailed engineering study, completed by a professional engineer licensed in North Carolina, which shows that the downstream drainage system is sufficient to convey the increase in flow due to the change in zoning classification and will remain in compliance with current standards
