- ST. LUKE'S VILLAGE DEVELOPMENT STANDARDS**
- Development of the site will be controlled by the standards depicted on this site plan and by the standards of the Charlotte Zoning Ordinance. The development depicted on this plan is intended to reflect the arrangement of proposed uses on the site, but the exact configuration, placement, and size of individual site elements may be altered or modified within the limits prescribed by the ordinance during the design development and construction phases within the building envelope line as shown on the plan.
 - Stormwater detention facilities will be designed to meet the applicable standards of Charlotte-Mecklenburg Stormwater Services. No stormwater detention will occur within any required buffer area. Inasmuch as the lowest point of the site is within the setback along Marsh Rd, the Petitioner reserves the right to locate all or a portion of the required stormwater detention within the setback if no other practical alternative is available. If located within the setback, no slopes for the detention area will exceed a ratio of 4 to 1.
 - Any detached lighting on the site will be limited to 20 feet in height in the interior of the site and 10 feet in height on the exterior of the site and will be shielded to prevent glare onto adjacent residential properties.
 - Signage will be permitted in accordance with applicable Zoning standards.
 - Parking will be provided in accordance with applicable Zoning standards.
 - Screening will conform to the applicable standards of Section 12.303 of the Zoning Ordinance. It is the Petitioner's intention that trash collection will be provided by a private contractor through the use of roll-out containers.
 - The use of the site will be for the construction of a 29 unit multifamily development. If not used for a multifamily development, the site may be used for any use allowed in the R-4 district in accordance with the standards for that district.
 - All buildings will be within 750 feet of a fire hydrant as prescribed by the Charlotte Fire Department.
 - Petitioner will dedicate additional right-of-way sufficient to provide 30 feet from the centerline of Marsh Rd. If present right-of-way is insufficient, Petitioner will dedicate a new right-of-way for the existing Little Hope Rd, and all property will be dedicated to CDOT. Any such dedication will be completed prior to the issuance of the first Certificate of Occupancy for the site.
 - All utilities serving the site will be located underground.
 - Access to the site will be provided by a driveway connecting to Marsh Rd.
 - The site must undergo planned multifamily approval prior to issuance of building permits.
 - The structures will be composed of duplex, triplex and quadplex homes, 1 to 1 1/2 floors in height.
 - In accordance with the provisions of the Ordinance, the Petitioner reserves the right to reduce the required buffer width up to 25% with the use of a fence or wall. In addition, the Petitioner may install an ornamental fence around all or portions of the site.
 - The Petitioner reserves the right to acquire a variance with regard to the height, setback, and/or fence requirements along the common property line with the St. Luke's Church and along the common property line with the Salvation Army property to the West and on the site.
 - The large trees indicated on this site plan along Marsh Road will be preserved. Any smaller trees (4" to 8" in diameter) removed from the Marsh Road setback will be replaced within this setback by trees of at least 4" in diameter.
 - To enhance the streetscape of Marsh and Little Hope Roads, the developer will design the 11 patios facing Marsh Road and Little Hope Road with a porch and steps treatment so that the street facade of each of these homes will appear to be the front of the house. Actual front doors will face the interior of St. Luke's Village. No portion of these 11 homes, including porches or patios or decks will intrude into the 30' setback.
